DRAFT ISSUE

### LAY BY UPGRADE KEY

1. Installation of 150x125mm bull nose kerbs along the length of each parking area. Approx. 25mm upstand to be provided
2. Make good around new kerbs and allow approx 300mm strip of asphalt in the carriageway adjacent to the kerbs (the existing edge is very uneven and will be further disrupted when installed the kerbs)
3. Installation of bull nose kerbs around the edge of the parking areas - to provide restraint to the bedding sand, geo-cellular grid and stone infill. 25mm upstand to be provided.
4. Scrape/break off approx. 45-50mm of the existing stone/asphalt/concrete. Regularise the surface and infill as necessary
5. Lay and compact 30mm of grit sand
6. Lay geo-cellular grid
7. Infill with recycled road planings.
